## Summary

---

Results-driven Flutter Developer with proven experience in building and deploying high-quality cross-platform mobile applications using **Flutter SDK** and **Dart Programming Language**. Proficient in **RESTful API integration**, **Firebase Authentication**, and **state management (Provider, Bloc, Riverpod)**. Skilled in designing **responsive UI/UX**, optimizing app performance, and applying **Clean Architecture**. Experienced in Agile workflows, version control with **Git**, and delivering scalable, maintainable solutions for e-commerce, social media, chat, and gaming applications.

## Education

---

**Bachelor's in Systems and Information**

**2021 – 2025**

## Work Experience

---

**Freelance Flutter Developer**

**Feb 2022 – Present**

*Remote*

- Designed, developed, and deployed cross-platform applications for Android and iOS using Flutter SDK and Dart.
- Implemented secure authentication systems (**Firebase Authentication**, email, phone, and social login).
- Integrated RESTful APIs, third-party SDKs, and Firebase Cloud Messaging for real-time updates and notifications.
- Applied state management solutions including Provider, Bloc, and Riverpod to ensure maintainable architecture.
- Optimized application performance, implemented responsive UI, and ensured compatibility across devices.
- Collaborated in Agile/Scrum environments with designers and backend developers using Git version control.

## Projects

---

**DarkChat**

**Feb 2022 – Mar 2022**

*Chat Application*

[GitHub Link](#)

- Built with Flutter, Firebase, and Bloc; features include light/dark mode, multilingual support, **Firebase Authentication**, group chat, and push notifications.

**DarkStore**

**Dec 2022 – Jan 2023**

*E-commerce App*

[GitHub Link](#)

- Developed using Flutter, GetX, and Laravel backend; integrated Google Maps API, Paymob payment gateway, and **RESTful API** connections.

**Dashboard**

**Dec 2022 – Jan 2023**

*E-commerce Management*

[GitHub Link](#)

- Managed inventory, coupons, orders, and user data with SQL Server integration and **Clean Architecture** principles.

**Royalsro**

**Sep 2023 – Oct 2023**

*Gaming App*

[GitHub Link](#)

- Integrated secure login, SQL Server backend, and Paymob payment processing for virtual goods.

**TheHottest**

**Nov 2023 – Dec 2023**

*Social Networking App*

[GitHub Link](#)

- Implemented role-based access, content posting, chat, and notifications with Firebase and REST APIs.

**iClick**

**Jun 2024 – Jul 2024**

*Social Media App*

[GitHub Link](#)

- Developed multimedia sharing (posts, reels, stories) with Laravel backend, SQL database, and **Firebase Cloud Messaging**.

**QUIZ**

**Jul 2024**

*AI Quiz Game*

[GitHub Link](#)

- Created AI-powered quiz application with category selection, multi-level challenges, and SQLite local database.

**Weather Plus**

**Oct 2024**

*Weather App*

*[Google Play](#)*

- Real-time weather data, multi-day forecasts, and geolocation using REST APIs and a responsive Flutter UI.

**Technical Skills**

---

- Languages:** Dart, PHP, JavaScript, SQL
- Frameworks/Libraries:** Flutter SDK, Laravel, Provider, Bloc, Riverpod, GetX, Dio, Firebase
- Technologies/Tools:** RESTful APIs, Firebase Authentication, Sqflite, SharedPreferences, HTTP, Clean Architecture, Git, Google Maps API, Paymob, CI/CD
- Databases:** MySQL, SQL Server, Firebase Firestore, SQLite
- Other Skills:** Cross-platform Mobile App Development, State Management, Responsive UI/UX Design, Agile/Scrum

**Languages**

---

- Arabic — Native
- English — Intermediate
